

Layer 1: Promot-Internalized Principles ("Dao")

Internalized Knowledge

- Evaluation dimensions
- Theoretical origins
- Scoring rubrics
- Few-shot exemplars

Popper (1934)

- Falsifiability
- Demarcation criterion
- "Testable = Scientific"

Kuhn (1962)

- Paradigm shift
- Normal science
- Scientific revolutions

Lakatos (1970)

- Research programmes
- Progressive vs degenerative

Pearl (2000)

- Causal inference
- Do-calculus

Merton (1942) - CUDOS

Communism | Universalism | Disinterestedness | Organized Skepticism

Layer 2: RAG-Retrieved Evidence ("Shu")

RAG Retrieval

- Dense (Embeddings)
- Sparse (BM25)
- Cross-encoder Rerank

Retrieved Canonical Passages

Popper:

"The criterion of the scientific status of a theory is its falsifiability..."

Kuhn:

"...scientific revolutions are those epochs in which one paradigm is replaced by another..."

Merton:

"The substantive findings of science are to be reported..."

Result: Actionable Guidance

Trigger Conditions

1. Deficiency Detection
2. Justification Need
3. Improvement Suggestion
4. Boundary Case
